MINIMAL ACCESS SURGERY

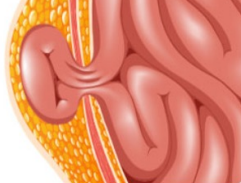

Bariatric & Metabolic Surgery

Achieve long-term weight loss and better control of diabetes with advanced bariatric and metabolic surgery.

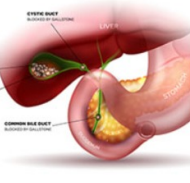

Kidney Stones

Kidney Stones, also known as renal calculi, are solid masses that form in the kidneys from the buildup of mineral and acid salts. They can vary in size from tiny grains to golf ball-sized.

Hernia

Hernia is a common medical condition when an organ or tissue protrudes through a weak spot or opening in the surrounding muscle or connective tissue. Symptoms of a hernia can vary depending on the type and location.

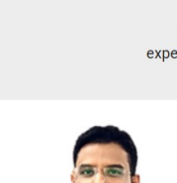

Gallstones

Gallstones, also known as Cholelithiasis, are small, hard deposits that form in the gallbladder. Gallbladder is a small organ located under the liver that plays an important role in digestion by storing and releasing bile.

MEET OUR DOCTORS

Embark on a journey of exceptional healthcare guided by industry's true luminaries who consistently exceed expectations and set new benchmarks for excellence in everything from cutting-edge innovations to personalized care.

WHY CHOOSE MASSH?

Choosing us as your healthcare provider means you are choosing a smart hospital, where we bring more than 25 years of experience in healthcare services and innovative practices to provide the highest level of care.

State-of-the-Art Facilities:

We are equipped with the latest technology and equipment to quickly and accurately diagnose and treat a wide range of medical conditions and ensure the best care to our patients.

Expert Medical Professionals:

We are committed to recruiting and retaining the best and brightest healthcare providers dedicated to providing personalised, compassionate care to each and every patient.

Minimal Access Surgery:

We lead in innovative minimal access surgery using the latest holmium laser and 3D laparoscopic methods, offering benefits like smaller incisions, faster recovery, lower risks, and shorter hospital stays.

Digital Integration & Patient Centric Care:

We have enabled seamless communication between patients and our medical teams, access to medical records, appointment booking, home lab tests, and active patient participation via secure cloud servers.
